

Transit and transit-oriented development

Resource	Organization	Description
Transit Oriented Development- Case Studies	Canadian Mortgage and Housing Corporation	Lessons learned from residential and mixed use developments built near transit nodes which would be of interest to developers, municipalities and planners. Case studies provide insight into common challenges and creative solutions so that developers of future projects can build on those solutions.
Transit Oriented Development: Best Practices Handbook	Calgary Transit	Key planning principles behind successful TOD. Handbook summarizes current practices for designing and implementing TOD
Center for Transit Oriented Development	Partnership between Center for Neighborhood Technology, Reconnecting America, and Strategic Economics.	Repository of best practices and ongoing TOD activities in the U.S. Resources include research and publications, copies of place-based plans and strategies, and recorded webinars on TOD.
10 Principles for Successful Development Around Transit	Urban Land Institute	Description of elements needed to ensure successful development, growing transit ridership, and livable communities.
CUTA Publications and Resources	Canadian Urban Transit Association	Variety of publications including issue papers, statistical reports, specialized research reports and technical publications, and CUTA's flagship magazine Canadian Transit FORUM,
