

Municipal Asset Management

What is Asset Management?

“The process of **making decisions** about the use and care of infrastructure to deliver services in a way that considers current and future needs, manages risks and opportunities and makes the best use of resources”

Source: Munis 101 (Elected Officials Education Program)

Why this matters for Municipalities?

60% of Canada's core public infrastructure is owned and maintained by municipal governments.

One-third of municipal infrastructure is in fair, poor, or very poor condition.

Canadian Infrastructure Report Card found that "All communities, particularly smaller municipalities, would benefit from increased asset management capacity."

Common Municipal Strategic Risks

Financial: Over-reliance on grant funding, insufficient capital reserves for infrastructure renewal, etc.

Organizational: Aging workforce combined with lack of succession planning, overreliance on undocumented knowledge of assets, etc.

Regulatory: Changing regulations requiring infrastructure upgrades.

Common Municipal Strategic Risks

Aging Infrastructure:

Periods of rapid growth and investment in the past can lead to infrastructure reaching the end of its service life at the same time.

Natural Disaster and Emergencies:

Forest fires or other emergencies may destroy or compromise infrastructure.

How Asset Management Supports Municipal Risk Management

Connect Risk to Service Levels and Cost

What we are doing in Alberta

Federation of Canadian Municipalities (FCM) Asset Management Program

Funding for asset management activities

- Assessments
- Plans, policies, and strategies
- Data collection and reporting
- Training and organizational development
- Knowledge Transfer

Funds up to 80% of eligible costs to a maximum of \$50,000

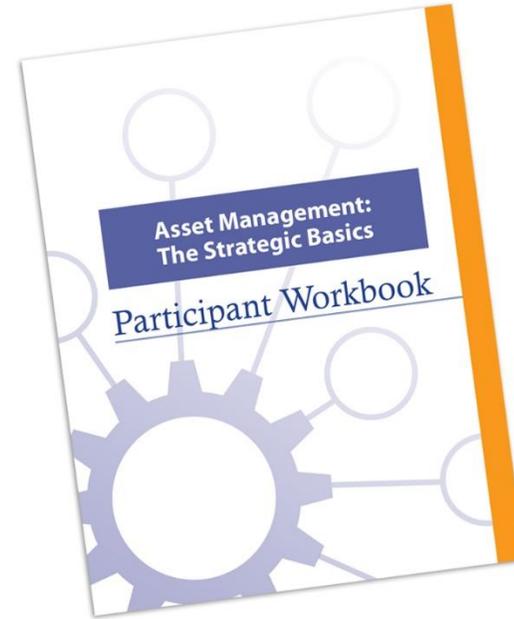

Partnership

Round One - Education

Latest Project

Bring Together 10 Municipalities to work together to move up the FCM Asset Management Readiness Scale.

- Population less than 10,000
- The 10 Municipalities should come from a similar geographic location.
- We would hire a consultant to support the participants in progressing above level 1 on some competencies of the readiness scale.
- Foster cooperation and provide a local support network for one another.

Asset Management Readiness Scale
